ANNAAS ANNAAFI

Senior Software Engineer — Full-Stack (Node.js / React / TypeScript)

Jakarta, Indonesia | +62 813-8773-8441 | annaazannaavi11@gmail.com | aannaafi.is-a.dev | Open to relocation

SUMMARY

Senior Software Engineer with 11 years of full-stack experience delivering production systems across Healthcare, Media Streaming, Broadcasting, and Compliance/Safety. Currently building a multi-tenant enterprise SaaS platform at KPA using Node.js, TypeScript, Vue 3, and PostgreSQL. Delivered measurable results: **improved application performance by 40%**, **cut technical debt by 60%**, and scaled systems to support **5x more concurrent users**. Experienced in 2-week Agile/Scrum delivery with international teams across Indonesia, Malaysia, Germany, and the United States, and in mentoring engineers. Currently exploring LLM-powered features for an F&B operations platform.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Java, PHP, C#
Frameworks	Node.js, Express.js, NestJS, React, Next.js, Vue.js (Vue 3), Tailwind CSS, Laravel, CodeIgniter
Databases & ORMs	PostgreSQL (Drizzle ORM), MySQL, Oracle, DB2, SQL Server, MongoDB, Redis
State Management	Pinia, Vue Query, Redux
Auth & Security	Passport, SAML/OIDC, RBAC, CSRF protection, rate limiting
AI / LLM	LLM APIs, structured output (Zod), tool/function calling, RAG, pgvector, text-to-SQL, MCP, prompt caching
Code Quality	SonarQube, ESLint, Husky, lint-staged, TDD, Feature Flags
Testing	Jest, Mocha, Chai, Sinon
Cloud & DevOps	AWS, Microsoft Azure, EC2, Docker, GitHub Actions, Jenkins, Ansible, Terraform, Heroku
Integrations	Stripe, LaunchDarkly, email/file storage services
Version Control	Git, GitHub, GitLab, Bitbucket
Tools	WebStorm, PhpStorm, IntelliJ IDEA, DataGrip, DBeaver, Tizen Studio

EXPERIENCE — 11 YEARS

Senior Software Engineer

KPA, LLC — United States (Remote) - **Sep 2023 – Present · 3 yrs 1 mo**

- Deliver a multi-tenant enterprise SaaS platform for safety/compliance operations as a senior full-stack engineer, using Node.js, Express, TypeScript, Vue 3, and Tailwind CSS.
- Design and ship modular backend services and front-end experiences across 7 functional areas (contractor management, forms, tasks, audits, incidents, safety workflows, and reporting) for large-scale customer workflows.
- Design and optimize backend services across 3 data stores: PostgreSQL via Drizzle ORM (transactional data), Redis (caching, queues, background worker/cron processing), and legacy MongoDB integrations.
- Secure the platform with customer-scoped access control and RBAC, authentication flows (Passport, SAML/OIDC), CSRF protection, and rate limiting for production environments.

- Integrate 5 enterprise services (AWS, Stripe, LaunchDarkly, email, and file storage) and build reusable, feature-based front-end architecture with Pinia state management and Vue Query.
- Ship production-grade, business-critical compliance systems backed by automated testing (Mocha, Chai, Sinon) and deployment tooling.
- Deliver on a 2-week Agile/Scrum cadence with a cross-functional team across time zones, using overlapping working hours to keep sprint cycles tight.

TECH Node.js, Express, TypeScript, Vue 3, Tailwind CSS, PostgreSQL (Drizzle ORM), MongoDB, Redis, AWS, Stripe, LaunchDarkly

Senior Software Engineer

Duriooplus Sdn Bhd (TV Platform) — Malaysia - **Sep 2022 – Sep 2023 · 1 yr**

- Engineered a media-streaming application from scratch for the Samsung Smart TV platform using Next.js and React.
- Resolved Tizen OS build limitations by optimizing configuration workflows, enabling seamless deployment across TV environments.
- Designed and implemented a spatial navigation system to handle complex remote-control (D-pad) inputs and focus-state management.
- Delivered pixel-perfect, responsive 10-foot UI layouts with consistent visual quality across multiple TV models.

TECH Next.js, Node.js, JavaScript, Redis, MongoDB, Docker, Tizen Studio

Senior Software Engineer

Bithealth.co.id — Indonesia - **Sep 2020 – Sep 2022 · 2 yrs**

- Cut API response times by 40% by owning high-performance REST API development (Express.js, Redis, PostgreSQL) and optimizing database queries and caching strategies.
- Contributed to a 30% lift in user engagement by building dynamic dashboards and a real-time doctor-chat application in Next.js and TypeScript.
- Cut technical debt by 60% by refactoring and modernizing legacy codebases.
- Reduced production bugs by 25% by driving code-quality practices: pre-commit linting, TDD, atomic design, and SOLID principles.
- Mentored a junior software engineer through code reviews and pairing sessions, supporting their onboarding to the team's stack and standards.

TECH Next.js, Node.js, Express.js, JavaScript, Redis, MongoDB, Docker, Elastic APM

Software Engineer

MNC Digital — RCTI+ (MNC Group) — Indonesia - **Sep 2018 – Sep 2020 · 2 yrs**

- Rebuilt a legacy system from scratch using React, TypeScript, Next.js, Redux, and Tailwind CSS.
- Cut response time by 30% and improved scalability by optimizing database queries.
- Raised code-quality scores by 25% through pair programming, code reviews, and continuous improvement practices.
- Cut code smells and technical debt by 40% by enforcing coding standards with SonarQube, linters, and formatters.

Backend Developer

NEXTCAST GmbH — radio.cloud — Germany - **Jan 2015 – Sep 2018 · 3 yrs 8 mos**

- Built radio.cloud, a Laravel-based monolithic platform, alongside Node.js/Express.js services for third-party integrations, news imports, and service bridging.
- Delivered integrated applications for major German radio clients (BLR, NRJ, and Antenne D), streamlining radio operations.
- Improved newsroom efficiency by 40% by building a real-time news dashboard and news production/reference-collector applications.
- Sustained 99.9% audio transmission reliability with mini-playlist software for Digital Audio Broadcasting (DAB+).
- Reduced audio-ingestion time by 35% and improved storage efficiency by 25% using FFmpeg for audio processing/compression and Spotify and MusicBrainz API integrations for metadata retrieval.

SELECTED PROJECTS

MySiloam App — Health-to-Go App

Healthcare mobile app for appointment booking, medical records, and billing, with real-time health analytics and prescription management.

- Cut API response times by 40% while scaling to support 5x more concurrent users.
- Cut chat latency by 50% by implementing real-time state management.
- Improved code-quality scores by 30% and reduced vulnerabilities by integrating SonarQube scanning.
- Delivered real-time chat and video consultation with Next.js and the Agora SDK, improving efficiency by 45%.

TECH Express.js, Next.js, TypeScript, Redis Pub/Sub, Agora Chat, Agora Video, PostgreSQL

F&B Operations Platform — AI Costing & Pricing (Personal Project)

Full-stack platform for food & beverage operations, adding LLM-powered features to optimize cost of goods sold (HPP) and increase revenue per order.

- Building automated HPP costing: extract supplier invoices into validated JSON with LLM structured output, update ingredient prices, and recalculate per-menu cost and margin.
- Implementing menu engineering (Star/Plowhorse/Puzzle/Dog) with margin alerts when ingredient prices rise, plus pgvector-based search for substitute ingredients and similar recipes.
- Designing basket analysis for bundling and guarded upsell recommendations, and a read-only text-to-SQL ops copilot with human confirmation before any price change.

TECH Node.js, TypeScript, PostgreSQL, pgvector, Redis, LLM APIs, Zod, Python (pandas)

EDUCATION

Gunadarma University — B.Sc. in Information Systems & Computer Science

GPA: 3.6 / 4.0

CERTIFICATES

- Java Fundamentals — 2019–2020

LANGUAGES

English — Fluent
